Hi Guys,

Here is your homework for next week. Imagine you are drawing up the paperwork associated with this design. What type of paperwork would you need? What information would be included? Who would it be distributed to? Also, list all the types of information that a lighting plan should have on it? Are there any pieces missing from the attached lighting plan?

Draw up a made up cue list with any relevant information, based on the attachments (up to 25 cues max – you do not need to reach the end of the show with your cues), and pick one other piece of paperwork to draw up and complete. For large pieces of paperwork, I will accept a shortened version that doesn't encompass all of the rig if you contact and discuss this with me first.

Mike, I've also attached my workings (excel file) for the power distribution exercise we did in the class, for your reference.

Best of luck,

Nik
